

EVERY DOLLAR COUNTS.

SO COUNT ON VULCAN.

No matter what type of foodservice operation you have, greater efficiency leads to greater profits. It's especially true in your kitchen, where utilizing the most energy-efficient equipment is your most effective way to manage ever-increasing monthly power bills.

That's why it makes sense to replace older equipment with ENERGY STAR®-qualified products. They'll not only save you hundreds of dollars every year on your utility bills, they might even qualify you for a credit from your state or energy provider.

**VULCAN INNOVATION: BETTER FOR THE ENVIRONMENT, BETTER FOR THE BOTTOM LINE.**

Being the industry's leader in innovation goes beyond achieving the ultimate in cooking performance, reliability and durability. It's ensuring that, throughout our product portfolio, we deliver the level of quality you've come to expect from Vulcan while helping you to maintain a profitable, sustainable operation that's efficient, productive and environmentally sound.

**2011 ENERGY STAR®  
SUSTAINED EXCELLENCE AWARD**

ITW Food Equipment Group-North America has again been honored with the ENERGY STAR® Sustained Excellence award. This is the second straight year we have received ENERGY STAR's highest honor, after earning back-to-back ENERGY STAR® Partner of the Year awards in 2008 and 2009. We're proud to be the first and only commercial foodservice equipment manufacturer to receive the Sustained Excellence award, and believe this clearly demonstrates our ongoing commitment to developing new products and technologies that help our customers save money and protect the environment.

IT'S ABOUT  
SAVING  
GREEN.
